ATTENTION ALL PASSENGERS

Travel to Republic of South Korea (ROK)

- All Non-US Passport holders traveling to ROK may require a Korean Visa and/or K-ETA prior to checking in for travel.
 - For VISA visit www.visa.go.kr
 - For K-ETA visit www.k-eta.go.kr
- Border clearance requirements must be met prior to selection for any flight.
- Border clearance requirements are ultimately the traveler's responsibility. Failure to meet those requirements may result in deportation

PET TRAVEL RISKS

- All pets are susceptible to the risk of heat stroke, respiratory problems, and the possibility of death during travel.
- Pets will experience altitude changes and extreme temperatures. AMC will limit the amount of time your pets are exposed to extreme temperatures, but we cannot prevent it. If your pet does not handle extreme temperatures at home, their risk might be higher in a kennel with the added stress of travel. Recommend you acclimate your pet: Suggest your pet be allowed to spend time outdoors to acclimate to extreme temperatures in a secure setting where you can monitor them.
- Pets with underlying health conditions, including obesity, are at increased risk during travel. Air travel may not be possible for some pets based on their age, health status or breed. Owners must carefully evaluate (with their veterinarian) their pet's health when making the decision to travel with their pet.
- Sedation during air travel is not recommended. Recommend speaking with your veterinarian regarding your pet's health and potential reactions or side effects of these medications and follow the prescribing information carefully.
- Pets may experience sensory overload during travel. Loud noises coupled with other animals and strangers near the kennel may lead to added stress and raise the risk of travel for your pet. Allowing your pet to experience these scenarios prior to traveling will assist in reducing stress to your pet.
